

SHWETA BANGAR

Full Stack Developer

shweta.bangar96@gmail.com | +91-7517939842 | Pune, Maharashtra, India | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and debugging production CRM features using React.js, Node.js, Express.js, REST APIs, and MongoDB. Delivered 2 core CRM modules and 5+ business workflows, including Invoice, Quotation, Attendance, Company House integration, and WhatsApp Notifications using Apache Kafka for asynchronous event processing. Experienced in frontend-backend integration, MongoDB data modeling, REST API development, third-party API integration, event-driven workflows, debugging, API testing, Git-based collaboration, and Agile development.

WORK EXPERIENCE

Techisor — Full Stack Developer | Togile CRM

March 2026 – August 2026 | Bengaluru, India

- Owned end-to-end development of 2 core CRM modules — Invoice and Quotation, delivering 5+ business workflows including Quotation Draft, Attendance Management, Company House, and WhatsApp Notifications.
- Developed responsive CRM interfaces using React.js, reusable components, forms, state management, API integration, and template-driven UI workflows for production business processes.
- Designed and integrated RESTful APIs using Node.js and Express.js, connecting React.js workflows with MongoDB and implementing request validation, middleware processing, error handling, CRUD operations, and business logic.
- Designed and maintained MongoDB document structures and data mappings for invoice, quotation, attendance, and company workflows, handling related CRM entities and persistent business data.
- Implemented dynamic Invoice and Quotation workflows with template-driven field mapping, data persistence, preview, document generation, and frontend-backend synchronization.
- Owned Company House API integration, handling external API requests, response processing, validation, and mapping company-related data into CRM workflows.
- Implemented event-driven WhatsApp notifications using Apache Kafka, where CRM actions published notification events to Kafka topics and consumers processed them asynchronously, decoupling notification workflows from core CRM operations.
- Investigated and resolved complex frontend, backend, API, and MongoDB issues, tracing data flows across application layers to identify root causes and improve production reliability.
- Debugged invoice/template persistence and rendering workflows, including dynamic field values, historical data handling, template mapping, and multi-page document layout issues.
- Tested REST APIs and CRM workflows using Postman, performing functional and regression testing across frontend, backend, API, and database functionality.
- Collaborated with developers, team leads, and managers on requirements, debugging, implementation decisions, testing, blockers, and feature delivery, incorporating technical feedback throughout development.
- Used Git and Zoho Sprints within an Agile workflow to manage source code, development tasks, blockers, bugs, testing, and feature delivery.

A2Z Infotech — Full Stack Web Development Intern

Feb 2021 – Jul 2021 | Ahmednagar, India

- Developed responsive web applications using HTML5, CSS3, and JavaScript, gaining practical experience in frontend development, API integration, debugging, and Git-based development under senior developer guidance.
- Built reusable UI components and implemented responsive layouts, JavaScript functionality, form handling, and API-connected workflows as part of hands-on web development tasks.
- Strengthened JavaScript fundamentals, responsive UI development, API integration, debugging, and problem-solving skills through practical development, senior feedback, and professional web development workflows.

TECHNICAL SKILLS

Frontend: React.js, Redux, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS, React Hooks, Context API, Responsive UI

Backend: Node.js, Express.js, REST APIs, CRUD Operations, Middleware, Request Validation, Error Handling, API Integration

Database: MongoDB, MongoDB Atlas, MongoDB Compass, MySQL, Firebase Realtime Database, Firestore

Messaging / Cloud: Apache Kafka, Microsoft Azure (App Services, Functions, Storage), Firebase, Cloudinary

Engineering: Git, GitHub, Agile, Zoho Sprints, Postman, API Testing, Functional Testing, Regression Testing, Debugging, OOP, DSA

PROJECTS

Healthy Habits Tracker

- Developed 5+ core habit-management features and 3+ Firebase workflows, including authentication, CRUD operations, real-time synchronization, and progress tracking.
- Implemented Firebase Authentication for user access control and Firebase Realtime Database for persistent habit data and real-time synchronization across application sessions.
- Built reusable React-based UI components and responsive interfaces for creating, updating, tracking, and managing daily habits.

Live Demo | GitHub Repo

MemeHub

- Built 4+ core content workflows for meme creation, upload, storage, retrieval, and real-time updates using JavaScript and Firebase.
- Integrated Firebase Realtime Database and Cloudinary for persistent content management, cloud-based image storage, and media delivery.
- Implemented frontend workflows for content management and real-time data updates while maintaining a responsive user interface.

EDUCATION

Masai School — Full Stack Web Development | Feb 2025 – Dec 2025 | Bengaluru, India

G.H. Raisoni College of Engineering and Management — Bachelor of Computer Engineering | Jul 2014 – Jun 2021 | Ahmednagar, India

Ethan's Tech — Azure Cloud Training | Sep 2022 – Oct 2022 | Pune, India

CERTIFICATIONS & ACTIVITIES

AZ-900: Microsoft Azure Fundamentals — Ethan's Tech — Completed foundational training in Microsoft Azure cloud concepts, core Azure services, cloud architecture, security, governance, and pricing models. Gained familiarity with Azure App Services, Azure Functions, Azure Storage, resource management, and cloud deployment concepts.

Xto10X Hackathon – Edition 4.0 — Masai School — Participated in a collaborative software development hackathon focused on rapid problem-solving, feature development and application building. Applied full-stack development concepts within a time-constrained environment while collaborating with team members.

ICITC Conference 2021 — G.H. Raisoni College of Engineering and Management — Participated in the International Conference on Information Technology and Communication (ICITC 2021). Gained exposure to emerging technologies, technical research, and industry-oriented technologies.
